

Raffaele Spinoni

Software engineer

Java Full Stack Developer with nearly five years of experience designing and developing enterprise web applications using Java, Angular and Kubernetes. Experienced in microservice architectures, REST APIs, CI/CD pipelines and Agile development. Continuously learning new technologies.

Work experience

Full Stack Developer **Amadeus** Nice, France / Since Sept. 2021

Full Stack Developer in an Agile team designing and implementing enterprise web applications used by travel agency customers.

- Participated in requirements analysis and solution design.
- Designed and implemented Angular features using TypeScript, Vite and Playwright in a large enterprise application.
- Developed Java microservices using Spring Boot and Quarkus, exposing REST APIs and integrating SQL and Couchbase databases.
- Deployed and maintained applications on OpenShift/Kubernetes using Docker containers and GitHub Actions CI/CD pipelines for automated build, test and deployment.

Junior Software Developer **Reply** Turin, Italy / From Feb. 2021 to Aug. 2021

Remote work as part of an automation team.

Experience interacting with AWS console and troubleshooting Linux servers.

Formative experience as ops role and upskill in cloud technologies.

Education

Master Degree **Politecnico di Milano** Milano, Italia / From Sept. 2019 to July 2022

Bachelor's degree **Politecnico di Milano** Cremona, Italia / From Sept. 2016 to Sept. 2019

Skills

Java

Usage of spring and Quarkus frameworks.

Familiar with Java design patterns.

Almost 5 years of experience with the language

used in: Backend, microservice architecture, REST API and CRUD DB interaction

Typescript

4+ years working experience, mainly using Angular framework but also writing plain TypeScript solutions.

Git

4+ years of experience with the program, used daily for software versioning

Python

1 year experience limited to data science applications (TensorFlow, Pandas, Numpy)

Data science

During the Master Degree at @Polimi the exam path focused mainly in AI and machine learning algorithms. The final thesis involved automatic segmentation of medical images using CNN-based algorithm

Assets

Team player

- collaboration oriented

Problem Solver

- solution-focused
- analytical

Willingness to learn

Languages

Italian native language

English

Two years of academic experience plus 5 years of professional usage.

C1 Level

› TOEIC : 840/990

French

More than 2years of professional experience

› DELF : 72/100

Other Interests

Sport: Climbing, Skiing and mountaineering

Reading

Skills

REST API Design

Kubernetes

Course-driven knowledge of kubernetes principle, experience defining IaC elements and using the Openshift portal

Docker

Docker containerization for local development and deployment.

CICD

Familiar with CICD principles, experienced with Jenkins pipeline and GitHub Actions and workflows

OS: Linux, Windows

Daily Linux command-line usage.
